

Declaration to customers on Regulation (EC) No. 1907/2006 (REACH)

January 4th, 2012
Revision H

Dear Customers,

C&K Components SAS is aware of the REACH regulation and all the duties which arise from this new legislation. For this reason we have established a REACH project group, which always updates the legislative requirements, started the necessary internal investigations and the communication with our suppliers.

It is C&K Components SAS strong intention that our product line will not suffer from the REACH regulation and we will be able to continue business with our customers without any limitation. This includes all implicated duties in the communication down the supply-chain.

The products which you receive from us are only non-chemical products (articles), which do not release substances or preparations under normal considerations.

Based on the current available information from our suppliers, we don't manufacture in dole site nor sell product containing more than 0,1wt% substances listed in the SVHC candidate list dated on December 19th 2011.

If you require more information, please don't hesitate to contact us at the following e-mail address detailed below and we will endeavour to answer your questions as best we can.

With best regards,

Laurent.kubat
REACH Project Manager
