

Change Notification
Manufacturing Flexibility of Box Type Film Capacitors
March 2, 2010

Identification	CCN-020109-MCB/Amendment 1
Affected Product	Box type capacitors produced by former Arcotronics and Evox Rifa companies, acquired by KEMET Corporation.
Change Description	Following acquisition of Arcotronics and Evox Rifa, the KEMET strategic plan continues to provide our customers with product offerings from our global manufacturing network. KEMET now has the ability to ship equivalent products (see affected products above) from any internally qualified KEMET location.
Justification and Benefits	This capability not only provides multiple manufacturing sites, but allows KEMET additional shipping flexibility. This enhances our ability to react to customers' urgent needs in emergency situations and provides the potential for commitment to shorter lead times in general. This is achieved without impact to product form, fit, or function as the products are equivalent with respect to physical, mechanical, quality and reliability characteristics. Each qualified location utilizes common manufacturing processes, complies with standardized control techniques, and meets stringent qualification testing to guarantee product performance. This allows KEMET to focus on best practices, bringing to market products resulting from the most technically advanced processes possible.
Effective Date and Identification	<p>As integration of these products is already complete, KEMET has the ability to implement this flexible supply approach immediately.</p> <p>Beginning date July 1 2010, KEMET shall expand this change to the locations per Attachment 2.</p> <p>Without acknowledgement of this notification by March 1 2009, KEMET will proceed to implement the change as described herein.</p> <p>Without acknowledgement of this amendment notification by April 2 2010, KEMET will proceed to implement the change as described herein.</p> <p>All products, regardless of location of manufacture are identified with a KEMET customer label indicating the KEMET logo, customer part number, and KEMET equivalent part number. As we continue the integration process, product packaging may exhibit the Evox Rifa or Arcotronics logo. When integration is complete, only the KEMET logo will be used.</p> <p>Attachment 1 provides examples of shipping labels from two of our qualified locations.</p> <p>Attachment 2 provides examples of shipping labels from two additional qualified locations.</p> <p>The country of origin (C of O or COO) will vary, depending upon the location the product was manufactured in.</p>
